INFORMING YOUR CUSTOMERS

ChatPal

Make small talk chat

1

CHATPAL STICKERS

Just email us at marketing@chatpalapp.com or via the in-app FEEDBACK feature and we will send you **FREE ChatPal QR STICKERS** to help. These stickers can be used on **tables, menus, or curbside parking spots** to alert customers to use ChatPal to communicate with your team or business

2

PHONE

When a customer calls to place orders (eg for curbside) request them to **download the ChatPal** app to effectively communicate with your team when they reach your address.

3

YOUR WEBSITE

Your website can be linked to the ChatPal download as well. Having your customers **download ChatPal** when they place orders via your website will make it easy to communicate with your team when they are at your location or curbside

4

EMAILS

Email your customers to have ChatPal downloaded and handy when they need to communicate with your team at your location. For example, inform your customer through **order confirmation emails** to **download ChatPal** and the app will enable seamless interactions when they come over for curbside pickup.

5

FLYERS

Use a **flyer template** from our website to spread the word to your customers. For example, in an office deli use case, the deli can print out a flyer from our template and pass it along to every office in their building to encourage the use of ChatPal. If any help is needed designing a flyer, please reach out to marketing@chatpalapp.com.
